The business continues to take proactive steps towards overcoming challenging competitive market conditions in the Australian and Chinese markets, that requires significant investment to drive sales to scale across multiple sales channels as well as brand marketing and channel support.

The Company's supply chain has continued to maintain our uncompromising commitment to safety and quality, coupled with continuity of supply supported by our partnerships with world-class manufacturers. This focus remains core to the company's strategy and philosophy, and the quality of our products remains the cornerstone of the Oli6[®] brand.

Sales revenue (excluding sale of raw materials) of \$7.5m for FY23, up 3.5% on the prior year

Nuchev delivered net revenue of **\$7.5m** for FY23 from Oli6[®] sales, in comparison to \$7.2m for FY22 with the business continuing to grow in Australia whilst maintaining a presence in China CBEC.

FY23 sales were impacted as a result of the change in distribution arrangements and a move to the new, exclusive distribution agreement with H&S Group agreed in Q4 FY23.

Sustained growth in Australian Retail channel

Oli6[®] continues to drive strong momentum in the Australian Retail Goat Infant Formula ("GIF") market being the **fastest growing GIF brand**⁴, available across all three major outlets.

Oli6[®] FY23 scan sales grew by **14% pcp**⁴, delivering a **significant increase in market share** with Oli6[®] market share growing by 9.1 percentage points pcp.

Gross margins maintained in core business

Gross margins for branded sales remain in line with prior periods, demonstrating the strength of the Oli6[®] brand, and our strong pricing discipline across all channels. It also signals our strategic approach to CBEC channel competition and responsible inventory management with distributorship changes.

Inventory holdings reduced by 44% in FY23

Our disciplined approach to inventory and working capital management has seen the Group's net inventory holdings significantly reduce from \$9.4m at the beginning of FY23 to **\$5.3m** at 30 June 2023, an overall reduction of **44%** over the last twelve months. Inventory investment to support the growth in sales through the H&S distribution arrangements commenced in Q4 and will continue in FY24.

Establishing a strategic partnership that will provide a platform for growth in China and South-East Asia

The company conducted an in-depth strategic review of our China business in FY23 which resulted in changes to the business to ensure future sustainable growth.

One of the key outcomes was negotiating a Strategic Distribution Agreement with H&S Group for China and South-East Asia that will serve as a platform for future growth in China and South-East Asia. H&S also became a significant shareholder of the business, ensuring strong economic alignment.

The three-year agreement between H&S International Group (**H&S**) and Nuchev for H&S to purchase and distribute a minimum of \$20m of Nuchev's product in China and South-East Asia, includes a strategy for Nuchev to rapidly develop and launch a bovine product.

Capital raise and tight cost control measures delivered a closing cash position of \$7.5m at 30 June 2023

The Group continues to maintain a robust and flexible balance sheet, with positive working capital and net assets including **\$7.5m** in cash with no external debt.

During the FY23 year the Group successfully raised **\$6.5m** from a rights issue and share placement to H&S Investments, before transaction costs associated of **\$0.7m**.

Net cash used in operating activities was **\$5.0m pcp** lower due to higher receipts from customers, lower investment in product manufacturing and operating costs and reductions in selling and marketing expenditure and general and administration costs.

Focusing on the future

Nuchev CEO Greg Kerr commented: "This last year has been a significant one for Nuchev. Entering into a strategic partnership with H&S will enable our offshore growth strategy, initially in China and then Vietnam. Domestically our business is strong, and our market share and volume continue to increase, and consumers appreciate the benefits of the product with Oli6 being voted the #1 Toddler drink on Product Review for the 3rd year in a row.

Despite a challenging global operating environment, I am pleased with our progress and ability to deliver on our ambitions. The business made substantial improvements in working capital management through cash used in operations with a **61% pcp improvement** and inventory levels better balanced with a **44% pcp improvement**."
